

Fix-It Fridays

Instructions:

1. **Make every alternate Friday a "Fix-It Friday"** — a day to solve challenges together and grow as a team!
2. A **Challenger** shares a work-related challenge — it could be about tasks, communication, deadlines, or team dynamics.
3. The **Fixers** (team members) brainstorm solutions together.
4. The team votes on the best solution (**Fix Finalised**).
5. **You can be a Challenger or a Fixer** — but you must take part in at least one Fix-It Friday session.
6. Upload this tracker by **5th April (EOD)**.

Example:

Date	Challenger	Challenge	Fixers	Suggested Solutions	Fix Finalised	Expected Result
22-March	Rahul	Code reviews are taking too long	Priya, Amit, Sneha	Create a checklist, set a 24-hour response time	Create a checklist	Faster and more consistent code reviews
29-March	Ananya	Too many Slack notifications causing distraction	Kunal, Rahul, Neha	Mute non-essential channels, set "focus hours"	Set "focus hours"	Fewer distractions and better focus

Date	Challenger	Challenge	Fixers	Suggested Solutions	Fix Finalised	Expected Result
22-March	Daren	App freezes when upload video or audio poll	Haresh, Bonisha	Enhance upload poll flow	Calculate video or audio duration while setting players.	It reduces poll duration computation time at the upload screen and fixes app freezes issues by making it faster.
29-March	Haresh	Identify client facing crash reports with details.	Bonisha	Track error by adding firebase crashlytics to record errors for fixes.	Implemented firebase crashlytics in the app.	It triggers all crash reports on firebase console if any user is facing their device and helps to add solutions to problems by encountering logs.
